# Release notes StationWare 3.6.C

| Ticket | Summary | Release notes |
|---|---|---|
| #314 | Chronological sorting of settings records in device view | The settings list is displayed in descending chronological order for default. So, the most recent data is displayed first in the settings list. |
| #315 | Separating the functions for 'adding a new settings document' and 'adding a new settings document version' | For a better user-friendly saving of documents the handling of settings documents and additional documents were coordinated. |
| #316 | Additional web service operations | The following Web Services were added to the StationWare system:<br>* The new methods LocationGetObjectsWithoutContent, DeviceGetObjectsWithoutContent and SettingsGetObjectsWithoutContent are similar to 'SettingsGetObjects' but with an empty <Content> tag. So only metadata will be returned.<br>* The new methods LocationMove and DeviceMove move a location to another location or a device to a device container. (Similar to the administrative data move.)<br>* The method DeviceCopy can copy a device to another device container like the device_copy function. |
| #317 | Delete group with users | If a user group, which contains users or other user groups as members will be deleted, a warning message will be displayed and all members will be listed. |
